

OPEN SOURCE · FREE · FOREVER

Four weeks of OpenAEC on GitHub

Hardly a day without a release. This is what happened across the open source AEC software ecosystem.

Aug 12 — Sep 10, 2026

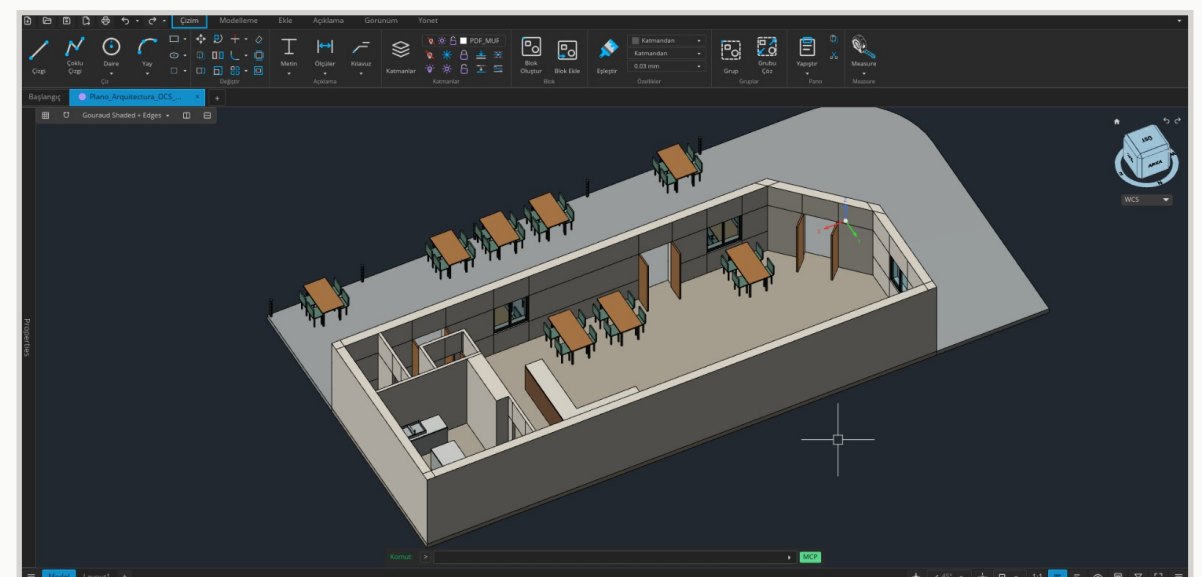

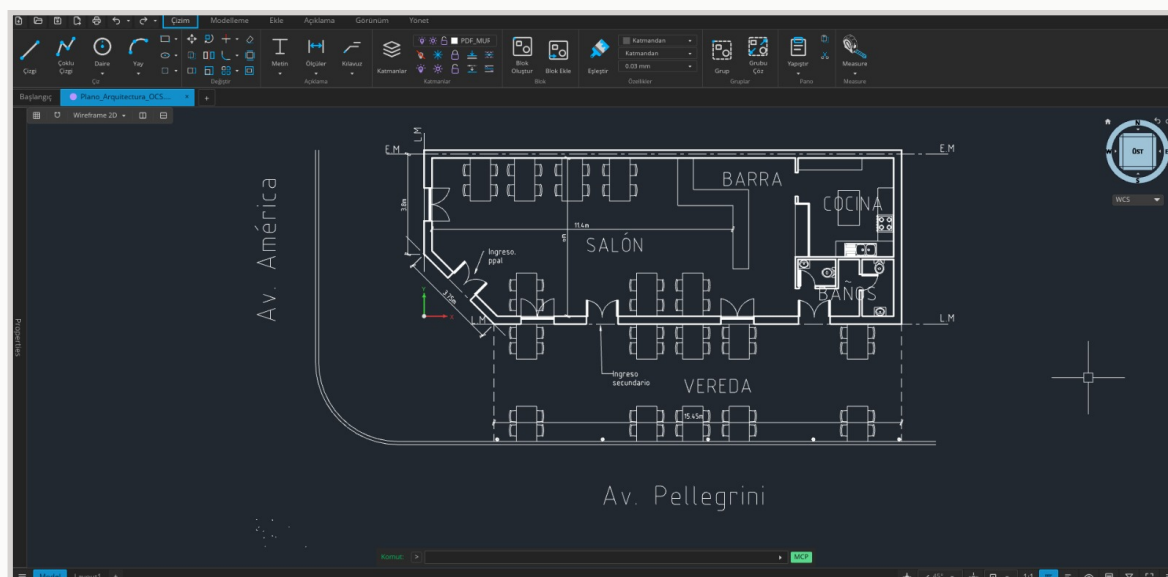

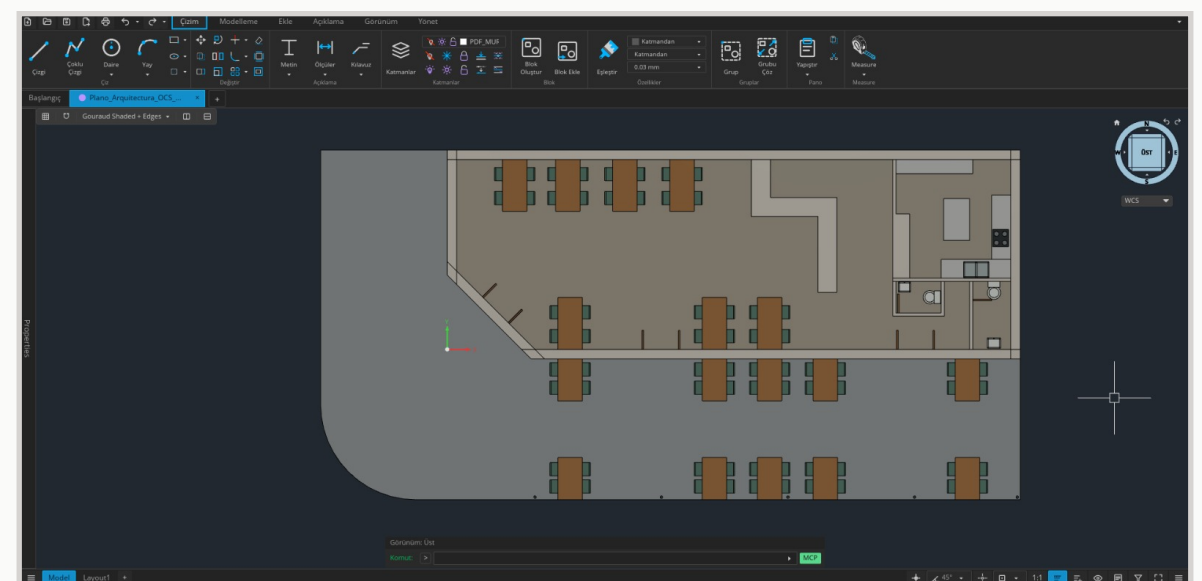

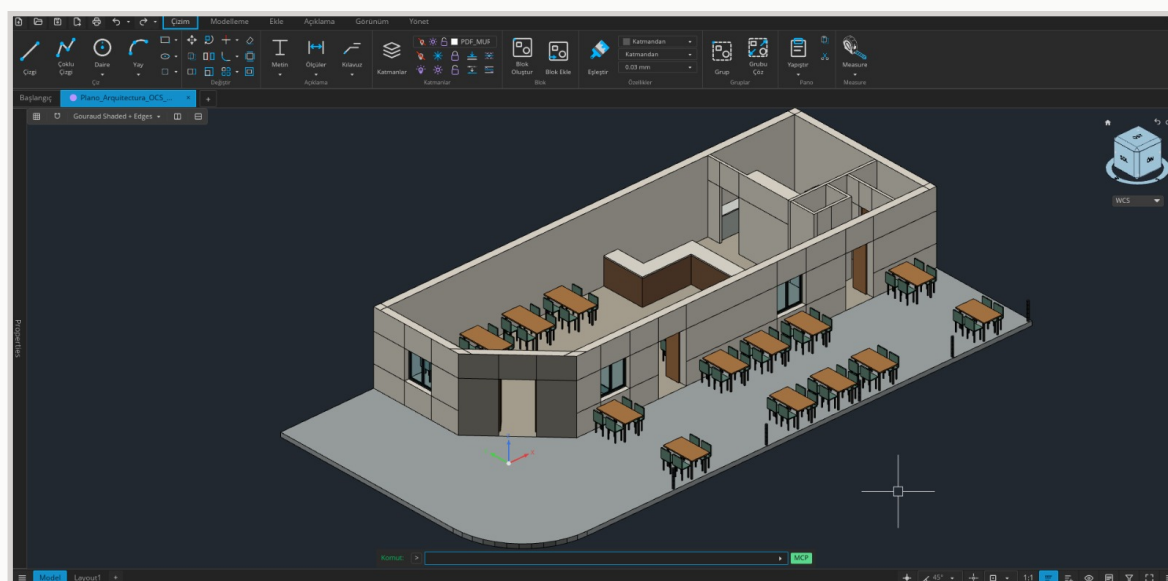

Swipe for the highlights →

01

Open CAD Studio

Past 4 weeks: 908 commits · 4 releases · 112 issues closed

- Now at 1,309 stars — a release every week (v2026.36)
- AI control has become remarkably good

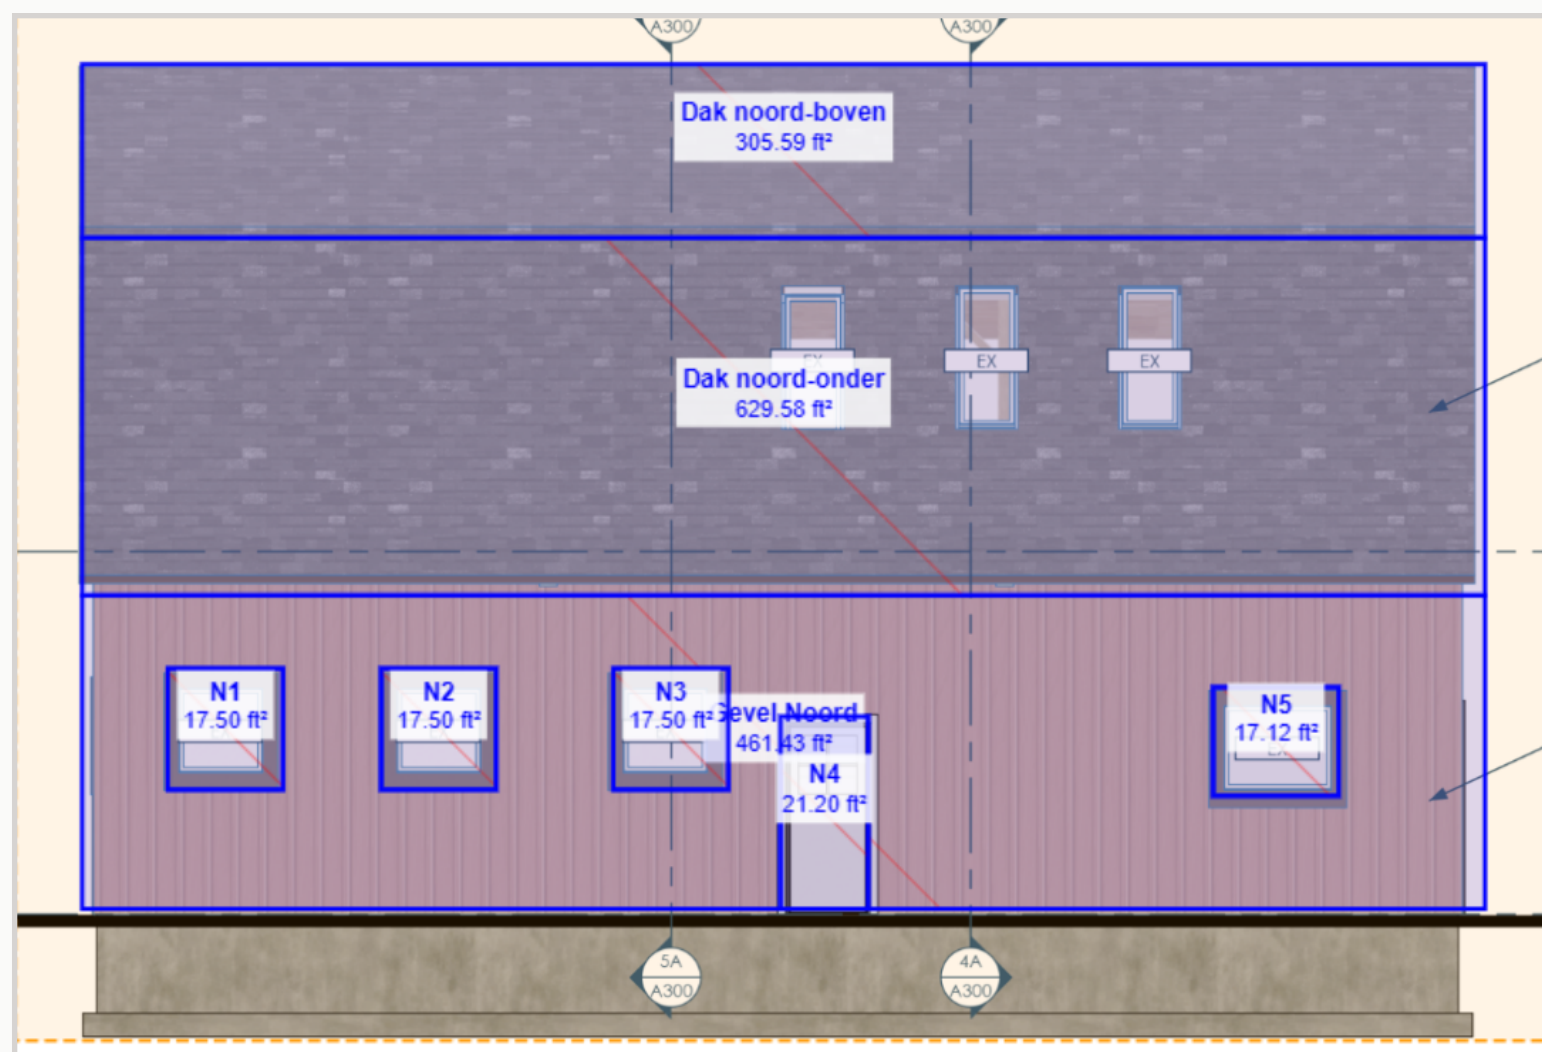

A PDF floor plan, converted by AI into this 2D drawing and 3D model

02

Open PDF Studio

Past 4 weeks: 110 commits · 5 releases · 22 issues closed

- 96 documented improvements, v1.92 → v1.96
- Heavy drawings stay sharp at every zoom level
- Rock-solid saving and remarkably good AI control

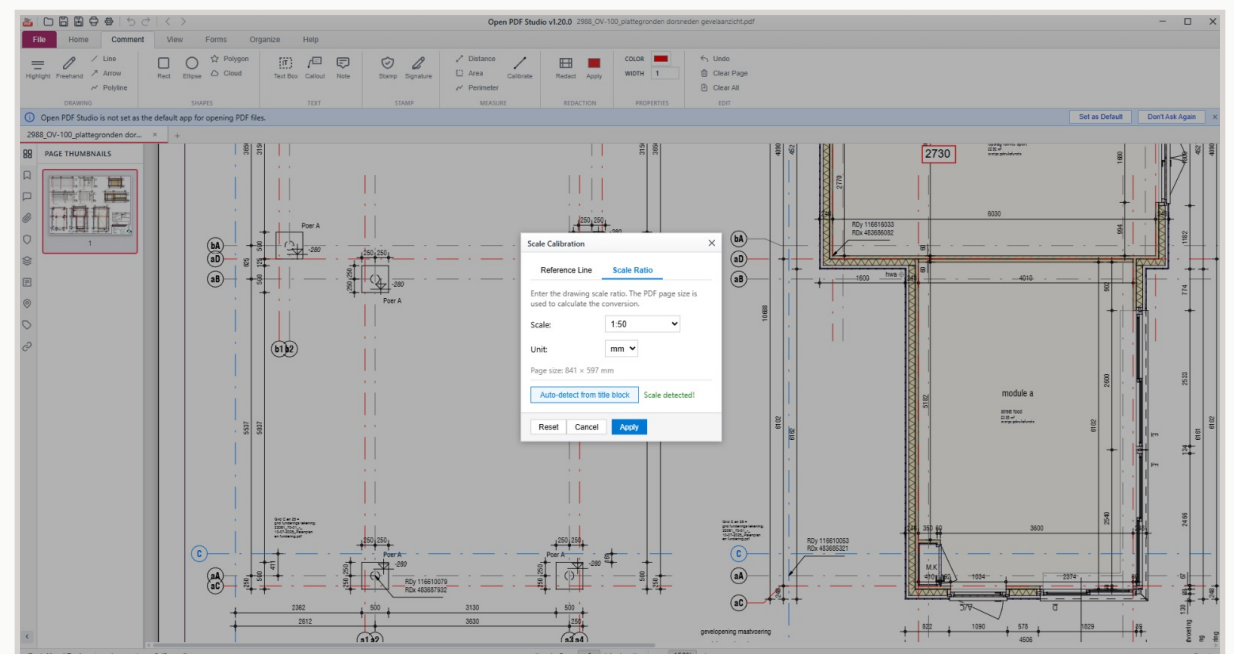

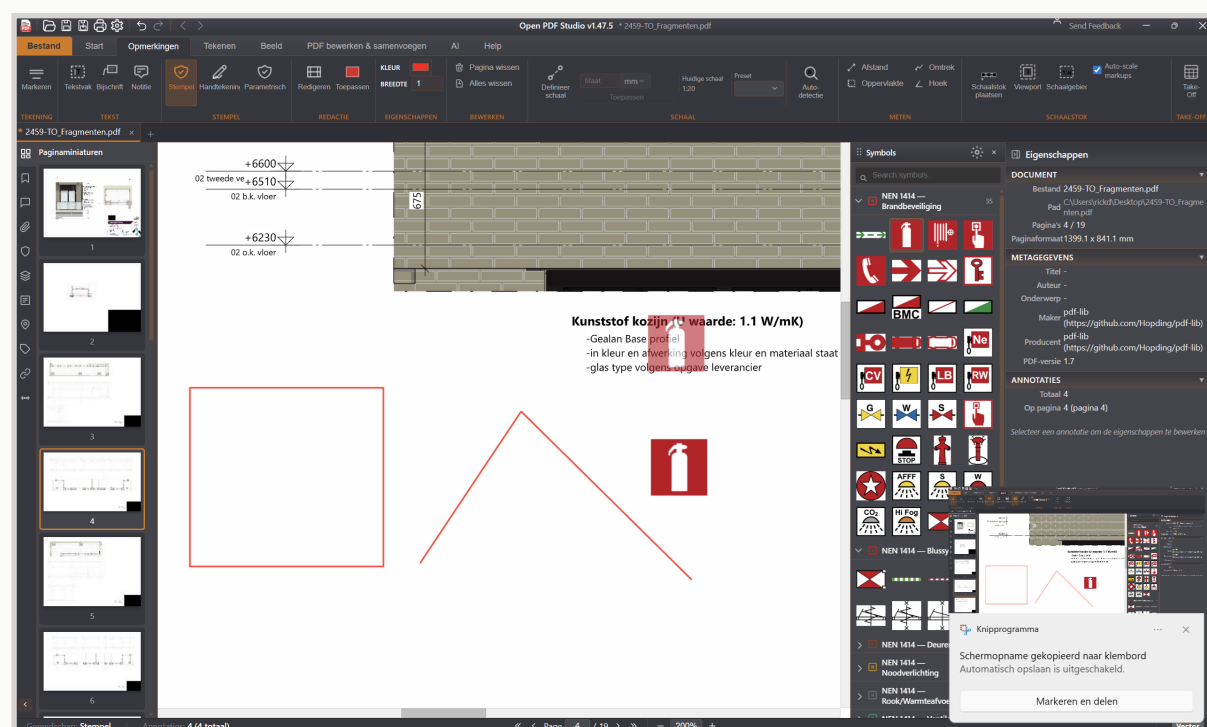

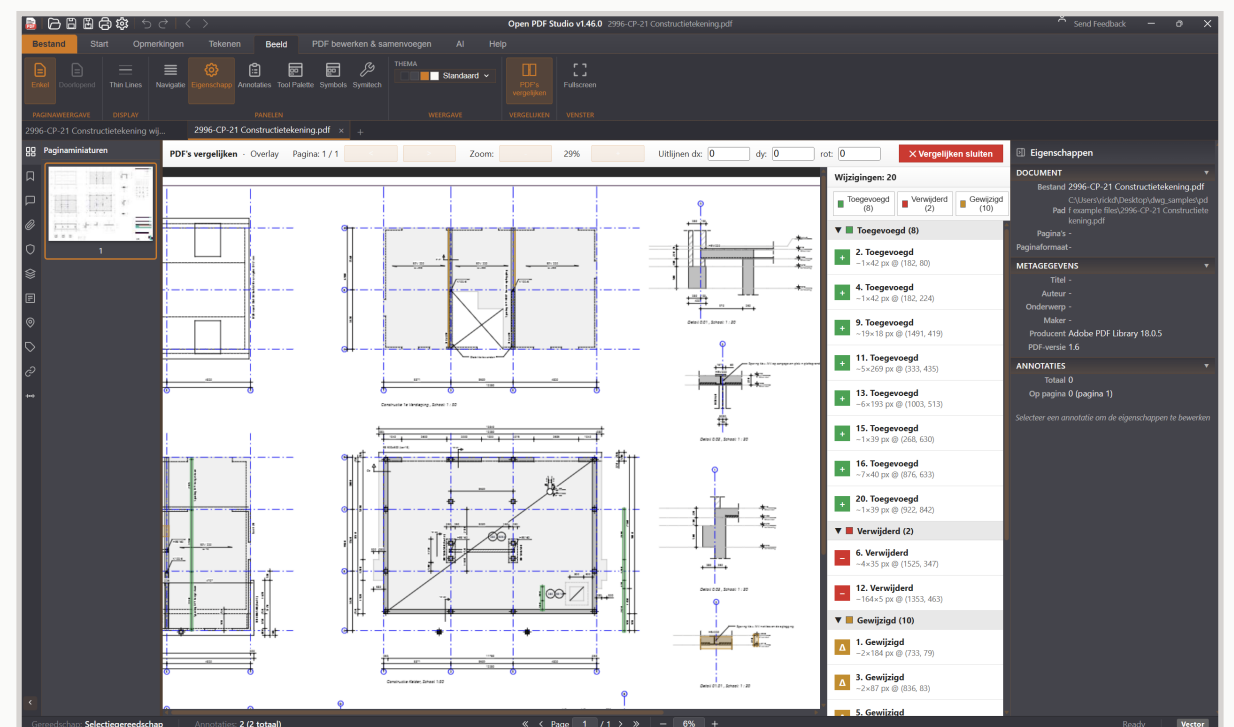

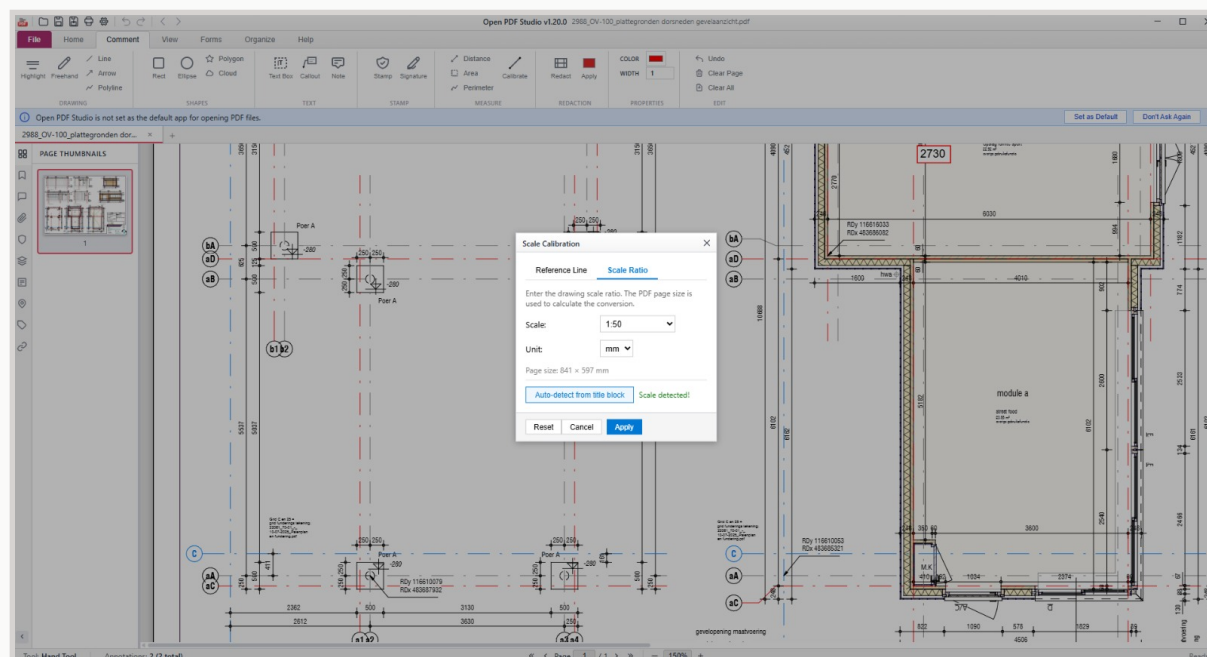

Measured surfaces with name and area — straight off the drawing

03

Open PDF Studio in action

Annotate, measure and organize — free and open source

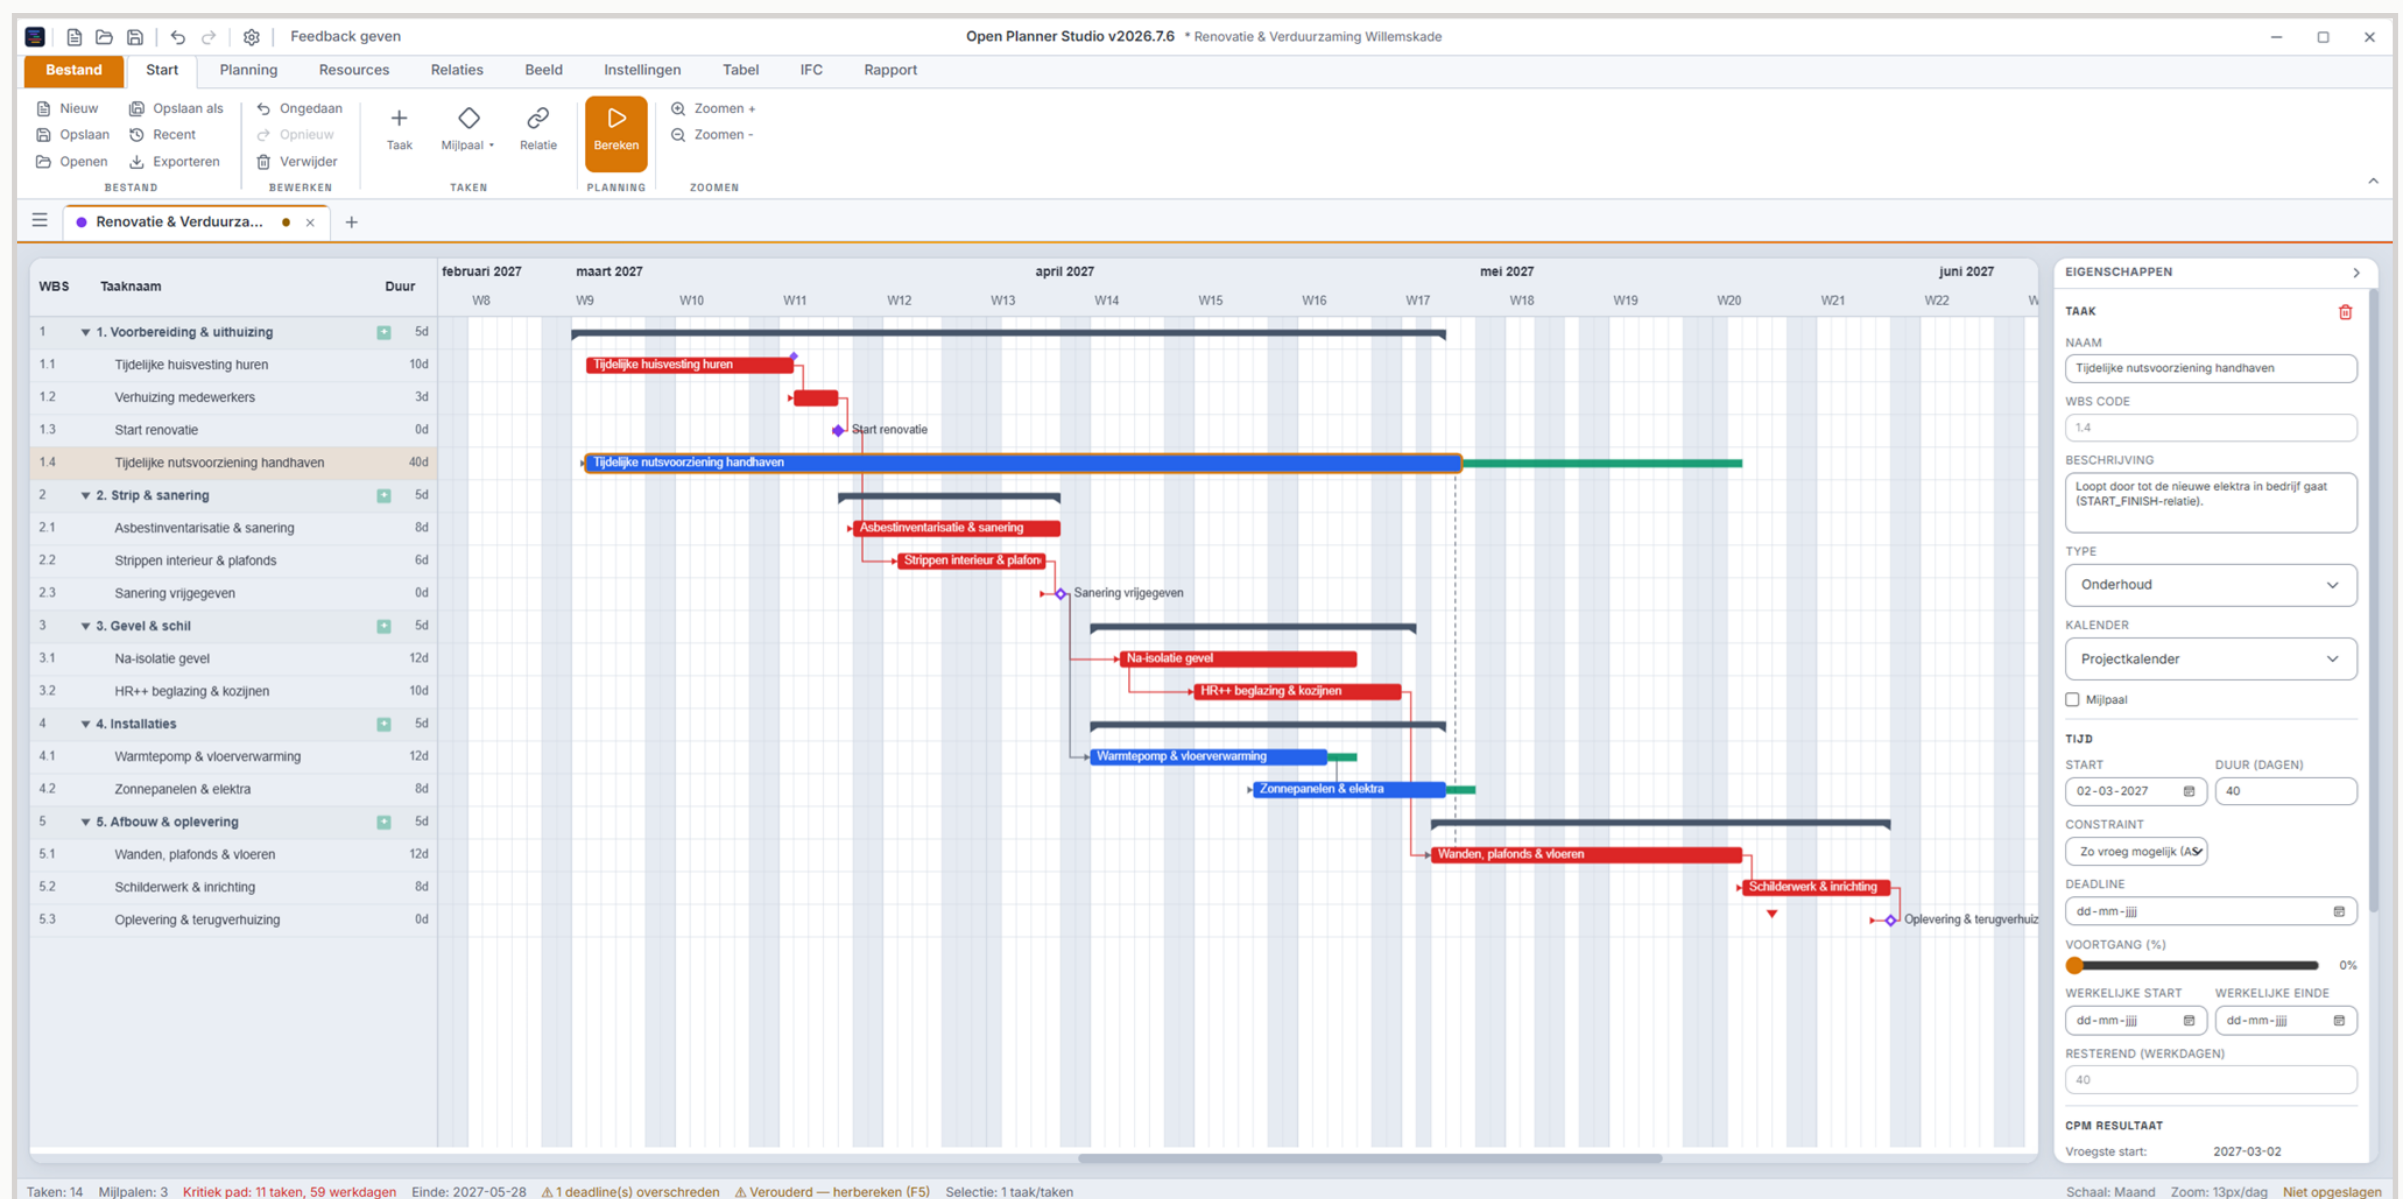

In 39 languages on Windows, Linux and Android

04

Open Planner Studio

Past 4 weeks: 835 commits · 3 releases · 30 issues closed

- See when one crew is double-booked across projects
- Your entire schedule in a single table

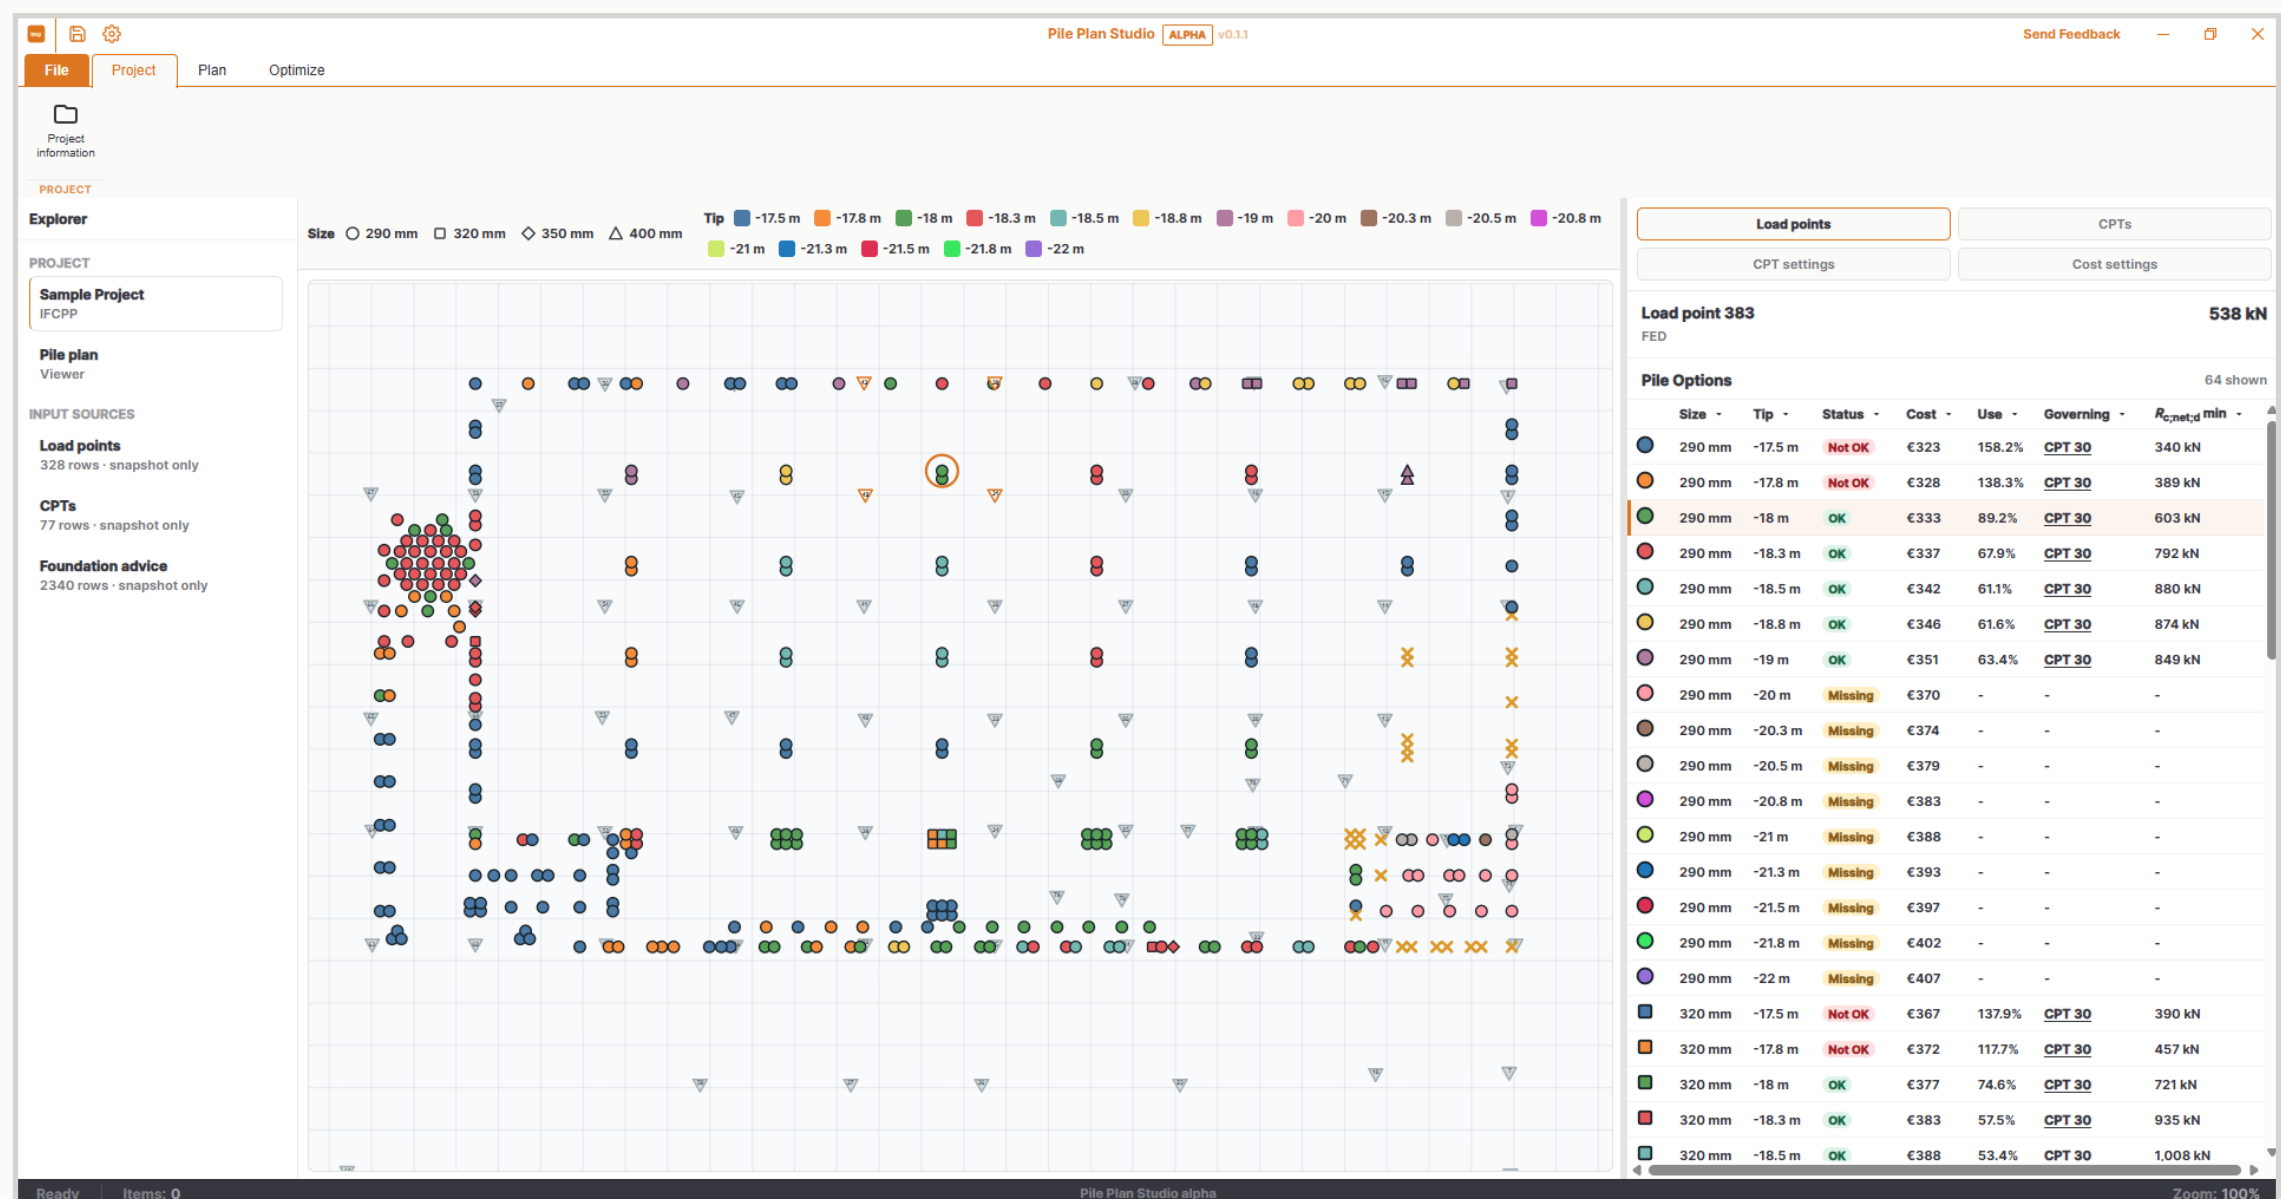

Gantt with critical path (CPM) — your schedule at a glance

05

Open Pile Plan Studio

Past 4 weeks: 134 commits · 4 releases · 9 issues closed

- Pile plans as open data — from drawing to site
- Load points, CPTs and pile options side by side

Alpha and moving fast — now at v0.3.0

06

Open Field Studio

Past 4 weeks: 6 releases · 54 documented changes

- Site surveys, inspections and handover on location
- Full project reports straight from your pocket

The screenshot shows the 'Project Exporteren' (Export Project) screen in the Open Field Studio application. The interface is clean and modern, with a dark header bar containing the app name and navigation links. The main content area is white and features a summary section, report type selection, and optional settings.

Open Field Studio

Project | Plattegronden | Opname | Inspectie | Oplevering | Dashboard | **Export** | Handleiding

Project Exporteren

Overzicht

Project Niet ingevuld	Adres Niet ingevuld	Plattegronden 1	Tickets 1
Foto's 1	Inspecties 2	Opleveringen 1	

Rapport type

- ☒ Volledig projectrapport
- ☐ Puntenlijst (open tickets)
- ☐ Inspectie-rapport
- ☐ Proces-verbaal van oplevering

Opties

- ☒ Foto's insluiten
- ☒ Plattegrond met markeringen

Buttons:

- Exporteer als HTML** (orange)
- Project Opslaan (JSON)
- Project Laden
- Alles Wissen (red)

Export a complete project report in one click

07

OpenAEC Installer

Past 4 weeks: 12 commits · 2 releases (v0.2.1 → v0.2.2)

- One installer for every OpenAEC tool
- Installs and keeps everything up to date
- One download to try the whole ecosystem

And there's more brewing

New and in the making:

- IFC-CAD — an open standard for storing any 2D drawing imaginable
- Open Pointcloud Studio — new version in the making
- DynLex — our own language: as fast as C++, made for AI-readable code, perfect Vulkan GPU control
- Open BIM Studio — the new BIM modeller, written in DynLex; first steps taken
- y-Next — the next generation of the Y-app

DynLex: github.com/OpenAEC-Foundation/dynlex

THE WHOLE ECOSYSTEM

Everything in the open

128	repositories
12,002	commits
43	contributors
2,500+	GitHub stars
55,000+	downloads

Every commit and issue in the open — free, forever.
